PROFESSIONAL SUMMARY

At Staff in Jakarta, I excelled as a Cybersecurity Engineer, leveraging expertise in Cryptography and Security Auditing to enhance network defenses. My proactive training of employees on security best practices significantly bolstered our cyber resilience. I adeptly integrated cutting-edge security tools, demonstrating a keen ability to adapt and lead in the ever-evolving cybersecurity landscape.

SKILLS

- Security Information and Event Management
- Cryptography
- Security Auditing
- Database Security
- Threat analysis

EXPERIENCE

Cybersecurity Engineer
Staff, 2024 - Current

- Installed and configured firewalls, intrusion detection systems, and anti-virus software.
- Trained employees on best practices for maintaining network security and safe online behavior.
- Evaluated new security tools and technologies as they become available in order to stay current with advancements in field.
- Responded to cybersecurity incidents, coordinating with relevant departments to resolve issues.
- Worked closely with vendors to resolve any identified security issues or concerns related to third-party applications.
- Coordinated with other team members during large-scale infrastructure projects, ensuring that all necessary security measures were properly integrated.
